SKILLS

- Languages: Python, SQL
- Databases: SQL Server, MariaDB, phpMyAdmin, PostgreSQL
- Data Engineering: ETL pipelines, Process automation, analysis and data processing (NumPy)
- Tools & Management: Git / Version control, drafting technical specifications, project monitoring

LANGUAGES

- French: C2
- English: C1 plus
- Spanish: B

QUALITIES

- Rigor: Absolute precision in data integrity and optimisation of code.
- Analytical mindset: Ability to translate complex business needs into efficient technical solutions.
- Autonomy & Proactivity: Proactive in automating obsolete manual processes.
- Communication: Strong listening ability for effective collaboration across production teams.

INTERESTS

- Technology monitoring: R&D, Python and Data ecosystems.
- Aeronautics & Space: Focus on industrial innovation and complex systems.

PROFESSIONAL EXPERIENCE

FULL-STACK DEVELOPER INTERN

DWE64 / BAYONNE | MAY 2024 - JUNE 2024 (5 WEEKS)

- Full-stack development: Design of dynamic features with React (front-end) and Symfony/PHP (back-end).
- Data management: Design, modeling and querying of the database.

QA DEVELOPER & PYTHON AUTOMATION INTERN

MAXSEA / BIDART | MAY 2025 - JUNE 2025 (6 WEEKS)

- Automated tests: Python scripts (Pytest, Airtest) for a marine mapping application (Windows/Android).
- CI/CD & Integration: Automated test execution on dedicated servers.
- Quality Assurance (QA): Defect identification, analysis and reporting to secure releases.

EDUCATION

BTS SIO - SLAM OPTION

LOUIS DE FOIX - BAYONNE | 2023 - 2025

- App development & integration: web/mobile design, OOP, frameworks and version control (Git).
- Databases: Modeling (Merise/UML), advanced SQL, stored procedures and triggers.
- Cybersecurity: Secure coding, data protection and access management.
- Project management (Agile): Requirements analysis, planning and documentation.

GENERAL BACCALAUREATE

SPECIALTIES: MATHEMATICS & NSI

CANTAU - ANGLET | GRADUATED IN 2023

- NSI: Algorithms, data structures, Python and network architecture.
- Mathematics: Boolean logic, probability and algebra (applied to databases and BI).
